SPRING VALLEY GUARDED.

Wounded Italian Dies, but No Trouble Is Feared.

Princeton, Ill., Aug. 10.—Ten colored men and forty-five whites were placed on the police rolls at Spring Valley yesterday as specials and under these conditions the Spring Valley Coal company resumed operations, and the colored men and their families, most of whom had taken refuge at Seatonville, six miles distant, returned to their homes in the city. The ten colored men who were appointed have armed themselves mostly with large horse-pistols, and they are considered sufficient to protect the colored settlement, providing they are kept together.

Sheriff Clark is keeping himself well apprised of the situation, and should another outbreak take place says he will probably go to the scene of the trouble at once, whether he is called by the mayor or not.

Barney Rollo, the Italian who was held up on the highway early last Sunday morning and after being robbed was shot four times, and over which affair the murderous assault on the colored settlement was made, died last night. The funeral will probably be held to-morrow, and at that time the largest attendance of any funeral in the history of the city is expected. A subscription will be taken up for the purpose of defraying the expenses. The Italians appear to be much affected over the death of the young man, and the circumstance will not add any to the quietude of the situation.

CLOUDBURST IN COLORADO.

Damages Done to Bridges, Crops, Railroads and Buildings.

Del Norte, Col., Aug. 10.—A heavy cloudburst in the hills west of Del Norte Thursday sent immense volumes of water down Francisco and Pines creeks, doing much damage to roads, bridges, growing crops, the Denver and Rio Grande railroad track and the property of the Del Norte Brewing company. The water flowed from the hills to the valley on both sides of Del Norte east and west.

Denver, Col., Aug. 10.—A special to the News from Grand Junction, Col., says: A cloudburst along the base of the Little Book cliffs carried away a portion of the Little Book railroad, also about fifty feet of chute at the Gordon mines. The well of water was about three feet deep as it came down the mountain side, but it only approached within two miles of the city, and comparatively little damage was done.

CRISP TALKS OF BIMETALLISM.

Finds No Interest Manifested in the Subject.

London, Aug. 10.—Ex-Speaker Chas. F. Crisp, who is now in London, was interviewed by a representative of the Associated press in regard to the chances of a monetary conference being called. He said:

"I could not discover in my travels in England that any interest in bimetal-

lism was taken among the people. They do not discuss it and do not seem to be educated up to it. Mr. McNeill, secretary of the Bimetallic league, informs me that the membership of the league is rapidly increasing; but what they consider rapid in England would be very slow in America. I have been invited to meet some of the leading bimetallicists, and perhaps they will show me that the cause is developing more than I now have reason to think it is."

Minister Dun promptly denied the existence of any such right on the part of the combatant, and a hot correspondence ensued.

The Japanese insisted on their right, and even when Mr. Dun reminded them that the United States had gone to war with Great Britain on just this issue, and had forced the abandonment of any claim to such a right, they refused to abate their pretensions one jot, though the minister intimated that the first assertion of such a right would be regarded by the United States as an unfriendly act, and, therefore, likely to lead to war.

The matter progressed to that perilous state, that when Admiral Carpenter was about to escort an American merchant steamship out of a Japanese port, to prevent her detention by the Japanese, the latter, it is said, gave orders to the shore batteries at the mouth of the harbor, to fire upon the American naval vessels if they attempted to do so.

This fact came out after the conclusion of the armistice, which fortunately occurred at just that point in the negotiations, thereby preventing an incident that would have certainly led to war.

The significant point is that since that time the Japanese have steadily clung to the same contention, promising serious trouble in the event of another war in the east.

SPANISH MINISTER TALKS.

Enmity for the United States Because of Sympathy with Cuba.

City of Mexico, Aug. 10.—Duquende Aros, the Spanish minister, said yesterday in an interview that he did not believe that public sentiment here would permit violence to neutrality laws, and that if all other nations had been as careful in this respect there would be no rebellion in Cuba. The Spanish minister asserted that when the rainy seasons end in Cuba the Spanish government will make a supreme and irresistible endeavor to suppress the rebellion. Speaking of the attitude of the United States, its press and people, who are alleged to be almost universally in sympathy with the Cubans and giving open aid to the rebel cause, the minister intimated that Spain would ask explanations, and would exhaust diplomatic resource before proceeding further and would then act as circumstances dictated. He would prefer that Cuba in a last resort be annexed to Mexico rather than have it become a part of the United States.

The railroads are denounced as being in a conspiracy against the canal.

READY FOR WORK.

New York, Aug. 10.—At the meeting of the Catholic Total Abstinence union yesterday the Rev. P. O'Brien, chairman of the committee on resolutions, presented the majority report. It was a bitter attack on liquor sellers and asked those engaged in the business to give it up. It also advocated a strict Sunday social law. The resolution attacked the press, Archbishop Corrigan, and Mgr. Satolli. Father Zurcker of Buffalo presented a minority report, which attacked the St. Vincent Abbey beer and Catholics generally for making beer. The majority report was adopted after a long and vigorous discussion. St. Louis, Mo., was selected as the next place, and the first Wednesday of August as the time for next year's meeting of the union. Father Cleary of Minneapolis was unanimously re-elected president.

TROUBLE WITH JAPAN AVERTED.

Uncle Sam Had a Just Reason For a Declaration of War.

Washington, Aug. 10.—In the event of a war between Russia and Japan, the United States may find itself an unwilling party unless the Japanese retreat from a position which they assumed toward the United States during the progress of the last war with China. It is not generally known that just before the declaration of the armistice which preceded the signature of the treaty of peace an issue had grown up between the United States and Japan that threatened to lead to actual hostilities between the two countries, and that a hostile clash was, perhaps, averted only by the conclusion of the Chinese war.

This issue arose through the assertion by the Japanese authorities of the right of search of American vessels. They insisted that they had the right to board an American vessel and if they chose to take from her any Chinese or any other enemy they might find, even though the latter were but passengers. Minister Dun promptly denied the existence of any such right on the part of the combatant, and a hot correspondence ensued.

The Japanese insisted on their right, and even when Mr. Dun reminded them that the United States had gone to war with Great Britain on just this issue, and had forced the abandonment of any claim to such a right, they refused to abate their pretensions one jot, though the minister intimated that the first assertion of such a right would be regarded by the United States as an unfriendly act, and, therefore, likely to lead to war.

BUSINESS CONTINUES TO BE GOOD

R. G. Dun & Co.'s Report of a Very Encouraging Nature.

New York, Aug. 10.—R. G. Dun & Co.'s Weekly Review of Trade says: "Business continues unusually active for midsummer, and though there is perceptible relaxation there are no signs of reaction. The one change of great importance which the last week has brought is eminently helpful—the amicable settlement between coal miners and employers in western Pennsylvania, Ohio and Indiana. It is said that about one hundred thousand men will have their wages increased after Oct. 1 by this adjustment, and while the enlargement of purchasing power is of consequence, it seems even more important that a chronic cause of controversy has been removed by the new agreement as to company stores.

"There is no important change in crop prospects, and at this time no news is eminently good news. Speculation has been more successful in cotton than in any other product during the week, and has lifted the price an eighth. Wheat has declined a fraction with very scanty transactions, the extremely small western receipts influencing the market for the present more than the restricted exports. The concerted withholding of wheat by western farmers, if continued, would doubtless affect the price in the end, but it has already stopped Atlantic exports almost entirely, the amount, flour included, having been only 753,330 bushels for the past week, against 2,956,436 bushels for the same week last year. When foreign markets have supplied their needs from other quarters the western farmers may find reason to regret that they did not ship their wheat at the ordinary time. Corn tends to lower prices with more encouraging prospects, and the expectation of a heavy corn crop affects prices of provisions, as might be expected.

"The industries continue to make progress, and higher prices for iron and steel products prove that the supply has not yet outrun the demand. Bessemer iron is a shade weaker, but gray forge has advanced about 60 cents, and finished products are remarkably firm. Lake copper has advanced to 12 cents. Tin has declined about a quarter of a cent, and is quoted at \$14.20. Lead is a trifle stronger at \$3.55. The anthracite coal market is completely demoralized, and prices have again yielded a little to about the lowest ever known.

"Sales of wool are not as much inflated by speculation as they were during the first half of July, but they still considerably exceed the actual consumption in the manufacture, amounting at the three chief markets to 6,559,300 pounds. Prices are very firm. Some staple cotton goods have again advanced in price, and the market is unusually strong for the season.

"Failures for the week were 225 in the United States against 264 last year, and forty-three in Canada against fifty-four last year."

TWENTY PERSONS INJURED.

Misplaced Switch at Indianapolis Causes a Street Car Accident.

Indianapolis, Ind., Aug. 10.—Twenty people were more or less severely injured in a street car accident near Crown Hill cemetery yesterday afternoon at 4 o'clock. The seriously injured are:

Mrs. Martin, leg broken and badly bruised.

S. Dennis, badly bruised on the legs.

Martha Sweeney, both legs broken.

Maggie Rice, face badly battered and bruised.

Edith Christ, legs bruised and other injuries.

L. H. Smith, back sprained and badly bruised.

Mary Bly, bruised.

Sarah Lanham, badly bruised.

T. B. Brown, leg broken.

All are residents of this city. Several others were more or less seriously injured. The wreck was the result of a misplaced switch. A heavy motor plunged into a trailer loaded with people returning from the Old Settlers' reunion. All the injured will probably recover.

Taylor Can Get Only Two Years.

Pierre, N. D., Aug. 10.—The defaulting treasurer, Taylor, and his bondsmen yesterday turned over to the state treasurer \$100,000 in checks and drafts as agreed upon when he surrendered himself in June, and also a list of properties in which the defaulter held equities or owned prior to his trip to South America. The value of the properties will be assessed by the state board and the amount agreed by them and the \$100,000 will be credited to the deficit. The bondsmen will make up the balance. The statute on which it was thought Taylor would be sentenced for twenty years is found defective and two years will be the maximum.

Forced to Stop Their Fishing.

St. John's, N. F., Aug. 10.—Intelligence from the French shore brings details of an exasperating outrage upon British subjects by an English war ship at the instigation of French fishermen. The war ship Pelican forced a party of Newfoundland fishermen to leave a fishing harbor on the French coast because the French wanted it. The Newfoundlanders had to abandon the fishery altogether. They will claim indemnity from the imperial government.

Minister Denby Criticized by Cable.

Shanghai, Aug. 10.—The Americans have sent a cable dispatch to President Cleveland protesting against United States Minister Denby's action in consenting that the British consul should represent America in the Szechuen inquiry. They recommend a reconstruction of the commission by sending an American official of adequate rank and the exclusion of implicated Chinese officials. They also recommend that a marine escort accompany the commission.

Warm Wave Strikes Chicago.

Chicago, Aug. 10.—There were seven prostrations by heat reported yesterday. One of them resulted fatally. The day was oppressively warm despite the recorded temperature, which did not exceed 91 degrees. There was a light breeze blowing, but it did not relieve the oppression. The humidity was low.

FOREST FIRES RAGE
IN THE FAR WESTWOODS ABOUT SEATTLE,
WASH., ARE IN FLAMES.

Little Can Be Done to Stop the Progress of the Blaze and Great Damage Will Undoubtedly Be Done Before They Will Die Out—Heavy Cincinnati Loss.

Seattle, Wash., Aug. 10.—Forest fires are raging in this part of the state, and will do untold damage as they cannot be easily controlled.

Cincinnati, Ohio, Aug. 10.—A factory and five buildings were destroyed by fire last evening. The building in which the fire started was owned by P. W. Short. SHOT IN COLD BLOOD.

Tragedy in Mississippi Yesterday—Talk of Slanderous Statements.

Brandon, Miss., Aug. 10.—A horrible shooting affray took place here at 9 o'clock yesterday, in which T. Dabney Marshall, a prominent lawyer and member of the state legislature from Vicksburg, and two of his friends shot and killed R. T. Dinkens, agent of the Austin Road Machine company. Dinkens, while standing on the platform of the depot, was approached by Marshall and his two companions, H. H. Coleman and O. P. Fox, of Vicksburg. Marshall walked up to Dinkens and said: "This is Mr. Dinkens," and, placing a pistol at Dinkens' stomach, discharged the weapon. Dinkens grabbed the pistol just as it was fired, and possibly the first shot did not take effect. As Dinkens backed away from Marshall there was a fusillade of shots from Marshall's companions. It is thought Dinkens fired Marshall's pistol at the latter, as it was found in his hand.

Marshall, Coleman, Fox and Marshall's law partner, Mr. Vallens, met in the waiting-room of the depot as soon as the bloody work had been completed and announced that they were ready to surrender, and the sheriff was called for.

The cause of the killing is a sensational story told about Marshall by Dinkens, that Marshall was guilty of a crime similar to the one for which Oscar Wilde is now serving a

OVER THE ROCKIES TO A LAND OF GOLD

W.C. WHITFORD VISITS DENVER
AND BOULDER.

**Acquire Under Cultivation Surprises
Him As He Rides Through the Foot
Hills—West Has Gained on Gold
As It Has Lost On Sil-
ver.**

The ride on a train in a July day, from Colorado Springs to Denver and then on to Boulder, a college town, is exceeding delightful. For over a hundred miles, from Pike to Long's Peak, the highest range in the Rockies, whose main peaks rise over 14,000 feet above ocean level, is in constant view, unless veiled by clouds of mist. Their snowy tops glisten at intervals in the sunlight. You fasten your eyes upon their sides and their shapes, and study the varying colors of green, purple and gray, which they present from their base to nearly their summits, as they glide slowly by in a magnificent manner. You are surprised at the greatly increased acreage under irrigation along the foothills and in the eastern slope, nearly the whole distance. Rich pastures, luxurious meadows of alfalfa, bountiful fields of grain, and patches of garden vegetables greet your vision. Curious rock formations along the first half of the journey invite your attention. At some points sandstone, now brilliant red and then creamy white, has been so tilted by the upheaval of the mountains that its strata stand almost vertical, and nearly as high at the gateway to the Garden of the Gods, where it rises over three hundred feet. In the valley to your left a mile away is a light grayish stone called the Monolith, from its resemblance to an obelisk. Beyond on both sides of the track are natural towers, castles and fortifications. A remarkable one is a perfect archway in the wilderness of the crooked rocks. Farther on to your right, stands Casa Blanca, a white castellated sandstone a thousand feet long and two hundred high, situated on a considerable eminence. Soon you reach a roundish tower named Castle Rock perched above you on a conical hill. Palmer Lake you have passed. It is a miniature reservoir, artificially constructed and fed from a neighboring height by an iron pipe, which delivers the water, spouting in the center and spraying on the surface by the wind, as in a large fountain or park. It is at the extreme divide between the Arkansas and Platte rivers into both of which it sends its supply through small rills running southward and northward.

The Charms of Denver.

We are always pleased with Denver. It has broad, well paved streets, substantial business blocks, and elegant residences. It lies principally upon a tract of land intersected by streams of water, and inclined slightly toward the mountains, which are in plain sight. The inhabitants impress you as strong, reliable and energetic founders and builders of a large city. The state capital on a terrace somewhat back from the depot is approaching completion. It is made of blueish gray granite, and is an imposing structure. The ground in front was being graded into a long and gentle slope. In the building, we had the pleasure of paying our respects to Mrs. Peavy, the state superintendent of public instruction and a sister of Governor Upham of Wisconsin. She was educated at Racine under the charge of Colonel McMyran, whom she remembers with great esteem; and she speaks of our state and its educational institutions with the fondest regard. We found her clerks to be women. She assured us that her department had not yet met with any question which it was unable to handle.

We found Boulder a brisk enterprising place of 5,000 people. It is located just where the plains enter a canyon, through which flows a large creek supplying the city with pure mountain water, and the fields below with sufficient moisture for excellent crops. Some miles back near the source of the stream, are gold and silver mines, a few of which are now worked. We met here, Rev. S. R. Wheeler and other old students of Milton college, also Rev. Mr. Cavena, once a member of our assembly from Milwaukee, and the pastor afterward of the Congregational church at Lake Mills. We unexpectedly and most kindly were greeted here by Mrs. Jennie Watt and daughter. The former was the second child of Major Fraser of Milton, and the wife of a Presbyterian clergyman, now deceased. She has been living in the town several years.

We return to Colorado Springs and

take the cars on the Midland railway for Grant Junction, and finally on the Rio Grande Western for Salt Lake City. The train winds around the base of Pike's Peak to the north and up through the pass in the midst of interesting scenery, and down into South Park. On the way a branch road turns to the celebrated mining district of Cripple Creek, but a short distance west of the Peak, and seen very distinctly from its top. The district measures about five miles north and south and three east and west. It was evidently once the bed of a lake or a depression between granite hills, six in number. Eruptions followed, carrying first breccia from these hills, each having a separate vein of gold and partially filling the depression. Afterwards fissures were formed in this deposit, and dikes of breccia and porphyry appear under it. In this way the gold was almost entirely buried beneath a thick bed, the rock of which was declared to be unlike any gold bearing found elsewhere. This may account for the fact, that its rich ore has remained until recently undiscovered, though the ground had been traversed and searched by hundreds of prospectors since Colorado was settled. But a man by the name of Stratton persisted in having confidence that gold in paying quantities could be found there, and he ransacked for several years the hills and valleys for the treasure. He was ridiculed by old miners as destitute of good sense. He was abandoned by parties who were for a time in company with him. But pluck and courage in his case has been grandly rewarded. Three years ago he was in almost destitute circumstances. He staked his claims and began to develop them a few days since he refused \$3,000,000 for ten acres of his property here, only a small share of it. In a very recent deal over a million was paid for an interest in some valuable mines. There are said to be now at least one hundred of these which ship ore to smelters and above one third more which mill their ore on the spot. It is reported that over \$7,000,000 of gold was yielded last year by the mines.

Footprints of Another Age.

Just as we descend to the entrance of South Park, we stop at an interesting locality called Florissant. Here are deposits of slate rock of the Tertiary period and in beds of the rock are found numerous impressions of the fishes and insects of the age. A bird and large butterflies are included in the list. About two miles south of the village is the siliceous formation of the stump of a redwood tree, forty-five feet in circumference and so hard that it has resisted the action of large steel saws to cut out five or six feet into its top. South Park in many places is nearly as level as Rock Prairie. Tributaries of the Platte river which rises here, were in some places very muddy, showing that parties were sluicing their beds for gold in the mountains which border the park on the south and west.

On our left, as we emerge into the upper valley of the Arkansas, a high ledge of rocks is pointed out to us at the mouth of Front Creek canyon, as the place on which Bierstadt, the American landscape painter, sketched his celebrated canvas called "The Heart of the Rockies." The central part of the painting embraces the widening of the valley, where the beautiful town, Buena Vista, is now situated; and the heights beyond, called the three Collegiate mountains, are clothed with evergreen trees on their sides and perpetual snow at their summits, all seen through a dense purple haze. On seeing this magnificent work, soon after it was completed, about a score and a half years ago, we were greatly awed by the sublimity of the scene.

We remain at Leadville long enough to get sight of California Gulch, where millions of gold were washed out of the sand and gravel sometime before silver was found here, and to traverse some of the principal streets of the city. Evidently business has declined here since the depreciation in the value of the white metal. Only a few of the old mines are worked at the present time. But Paul has been benefitted, while Peter may have been robbed. A systematic search has been made for the deposits of gold in veins, evidently existing in places in this region and for years totally neglected, and several very rich mines have been found and opened. It is to be seen whether the gold subsequently obtained here will bring as much wealth to the people as have the silver carbonates in the twenty years past.

W. C. WHITFORD,

A Novel Traction Engine.

Messrs. Cheesbro & Madden, of Indian Ford, have lately purchased a gasoline traction engine, the first of its kind to be brought to this part of the country. The engine was bought through George Lackner, of Indian Ford, and is made at Cincinnati, Ohio. It differs greatly from the old style traction engine, and is an improvement in every way, there being absolutely no danger of explosion or fire and it can be run at much greater speed. The machine will be used for threshing purposes and will be in readiness for work by Saturday. The addition of this engine to their threshing outfit makes it the most complete in Rock county.

LONG HAIRD POET AGAIN IN TROUBLE

E. FRANCES MORAN, OF RAGING
ROCK FAME WEARY.

Refused to Help His Wife Water Tobacco and From His Shady Quarters, Chided Her Because of Her Lack of Ambition in That Direction.

Should a poet's wife make him water tobacco plants?

Ask E. Francis Moran, the ruddy ringleted rhymist of the raging Rock. He will say "No," and most emphatically, "No."

Mrs. E. Francis and her rhymist reside near the rushing Rock at the four mile bridge, but their abode is far from harmonious. Mrs. E. Francis and her husband are both in town today and both are inclined to talk. Mrs. Moran told the police that her husband was "indolent." But of course that is merely her story for it. She said that on or about the Fourth of July she was engaged in watering the tobacco plants that were sweltering in the field. E. Francis was not so engaged but watched the work from a shady nook where no sun toyed with his auburn ringlets. The sun was exerting its full force upon the industrious wife and finally she weakened.

"Why don't you come out and help me work?" she demanded of E. Francis as the beads of perspiration rolled down her cheeks.

Francis Was Languid.

"What's the use?" asked E. Francis languidly.

"Well I think you could."

"My dear wife" Francis replied with the drawl of a three-ply professional poet, "You have no kick coming. Why do you stay here? Why don't you go away? Don't you know that I can go to Janesville and get a woman to come out here who is not afraid to work? Don't you know this lady has money enough to support me in idleness? Can you do that much? Hush woman and ply these thy water bucket for I fain would write a sonnet."

Then Mrs. E. Francis rebelled. It was enough to be charged with all the farm work without being chided. She came to town and told the officers that E. Francis had her watch and other goods and chattels that she wished to recover but could not. The police referred her to a lawyer and E. Francis watched her go to the lawyer's office. Then he took his stand at the foot of the stairway and smoked a cob pipe. Near at hand sat Mr. Moran, Sr., father of the poet. What they will do about it is not known.

MILTON BALL NINE BEATEN

Palmyra Team Won by a Close Score—President W. C. Whitford Is Home.

Milton, Aug. 9.—A large crowd, including a good sized delegation from Janesville, saw the Palmyra and Milton clubs play Thursday afternoon. The visiting aggregation included players from Palmyra, Madison, White-water and Lima. In the first inning Palmyra scored four and the home got a goose egg, also in the second, and scored in the third, fourth, fifth, sixth, seventh, eighth and ninth. The visitors got coated with whitewash in the third, fourth and sixth and scored in the fourth, fifth seventh, eighth and ninth, winning the game in the ninth by a score of 17 to 10. It was an exciting game from beginning to end, first one club forging ahead and then the other. Holmes and Gates made home runs for the Palmyras and Aiken and Wilbur for the Miltons. The umpire, Mr. Trautman, of Whitewater, was badly off in judging balls and strikes in the last two innings. Batteries: For Milton, Rice and Aiken; for Palmyra, Haney-Wooster and Holmes. Struck out—Rice 12; Haney 13. Errors—Milton 5; Palmyra 16.

Miss Mollie Struby, of Louisville, Ky., and her nephew, Master Chauncey Brown, who have been visiting here, returned to their southern home on Thursday, accompanied by Mrs. Blount, of the telephone. Dr. James Mills of Janesville was here Tuesday in company of Dr. Borden in the case of Miss Kittie Waterman who is dangerously ill. The Palmyra ball team are rain makers in this place. Treasurer W. P. Clarke leaves tomorrow for Sheboygan to attend the session of the Pharmaceutical Association. F. A. Root is in charge of the drug store during his absence. Mrs. Blakeslee of Detroit, who has been the guest of Milton relatives for some weeks returned to that city Wednesday night. Mrs. George Bacon accompanied her. J. Sharpe of Delavan, visited Mrs. F. A. Clarke Wednesday. H. L. Davy and his mother have gone to Peachontas, Iowa, to visit Mr. and Mrs. H. C. Saunders. Miss Wilcox of Chicago is the guest of her uncle, James Coon and family. Rev. George Smith of Lima, formerly pastor of the Congregational church, visited James McEwan and other friends Wednesday. Cashier Green did business at Afton this week. F. A. Root was at White-water Tuesday. President W. C. Whitford returned from his California trip this week and expects to go east in about ten days.

BUGS SENT TO A NEIGHBOR

Swarm Transferred to a Corn Field After Barley Had Been Harvested.

A Heart Prairie farmer raised a fair crop of barley and a large one of chinch bugs this summer. After he harvested his grain the houseless bugs started in myriads for a corn field near by. The owner came in alarm and indignation and gave notice that he wanted the bugs kept off his place and said that he should look to the man who raised them for pay of any damage done. A spirited colloquy followed which ended in the aggrieved party's adding to his sorrow and loss by paying a fruitless visit to a lawyer.

DOINGS OF THE HARNESS HORSES

FIDOL, the phenomenal pacer that won the purse for free-for-all pacers here, went three sensational miles yesterday when he turned the Terre Haute track in 2:04, 2:07, 2:05. It was a horse that Janesville people saw, that made Fidol hold that clip, for Frank Agan, who won second money here was second in each heat at Terre Haute. Fidol has won five races in six starts and can go faster than 2:04 if necessary.

J. O. GERRITY, the Oshkosh driver who never misses a Janesville race, meeting, won the 2:14 trotting purse at Terre Haute, with B. E. P. going in 2:11. Dollie Wilkes was second. Senator A. third, Maud C. fourth and Ben B. fifth. The latter three were all seen here last month.

F. R. BOYCE'S Prairie Lily was picked out to win the 2:14 pacing purse at Terre Haute, yesterday, but only got fourth money. Be Sure was the winner, with Badge, second and Nellie third, the best time being 2:06. Mr. Boyce's home is at Brooklyn, Wis.

CLARK COMPANY'S TRADE IS GROWING

VALUABLE PATENTS HELD BY
LOCAL MANUFACTURERS.

Cash Carrier Sells For \$18 and Rivals the \$75 Sort—Post Hole Digger, Bag Holder, Music Cabinet and Farm Gate Hinge All Good Sellers.

When Janesville men start out to do a thing they do it. This is one thing you can always "bank" on. When E. W. Lowell, F. R. Pendleton, H. S. Gilkey, S. B. Smith and J. W. Clark organized the Clark Manufacturing Company, they did so with the idea of making the firm a power and they have succeeded. The firm manufactures hardware specialties and their business is constantly on the increase. They are now talking of moving into new quarters that will give them the facilities that they need.

The company is now making a new cash carrier, for stores, that is simply perfection, while the price is about one fourth of the usual cost. The carrier is the invention of Mr. Clark, and unlike any other carrier, any number of lines can be run to one central station at the cashier's desk, thereby reducing the expense materially. For a system such as other firms charge \$75, the Clark company ask but \$18, and the mechanical principal cannot be improved on. Mr. Lowell now has these carriers in both the main store and the annex, where they give perfect satisfaction.

The company also sell Clark's patent post hole digger, truck and bag holder, buck saw tightener, music cabinet and farm gate hinge. All of these specialties are Mr. Clark's inventions and all are pronounced perfect for the purposes intended. The officers of the company are:

President—E. W. Lowell.
Vice President—F. R. Pendleton.
Secretary—H. S. Gilkey.
Treasurer—Stanley B. Smith.
Superintendent—J. W. Clark.

To Write Upon the Sea of Agony
Is what people troubled with rheumatic symptoms can fairly expect, if they take no efficient means to check the rapidly growing malady which, it should never be forgotten, has a tendency to attack the heart and terminate life. The testimony, public and professional, is overwhelmingly convincing, and concurs with Hostett's Stomach Bitters is both a sovereign preventive and curative of rheumatism. It completely expurgates from the blood the acid principle which, attacking the tissues surrounding the joints and muscles, causes such exquisite pain. The Bitters promotes the action of the kidneys, bladder, stomach and bowels, and remedies malaria, nervousness and debility. It also induces appetite and sound repose, hastens convalescence after exhausting maladies and mitigates the infirmities of age. Take it daily at regular intervals, and confidently expect the best of results.

The Only Remedy in the World that Refunds Purchase Price if it Fails to Cure the Tobacco Habit in 4 to 10 Days is

Narcoti-Cure

It Cures while You Continue the Use of Tobacco.

The greatest discovery of the age!

A certain, pleasant, permanent cure. A lifetime's suffering ended for \$5.

Why smoke and spit your life away? Why suffer from dyspepsia, heartburn and drains on your vital forces?

Stop using tobacco, but stop the right way. Drive the nicotine from your system by use of this wonderful remedy.

Narcoti cure is warranted to remove all desire for tobacco in every form, including cigar, cigarette and pipe smoking, chewing and snuff taking.

Use all the tobacco you want while under treatment, and in from four to ten days your "hankering" and "craving" will disappear—the weed won't taste good. Then throw away tobacco forever.

Narcoti-Cure is entirely vegetable and free from injurious ingredients. It calls to vivacity and new vigor to the weakest constitution.

Remember Narcoti-Cure doesn't deprive you of tobacco while effecting a cure; doesn't ask you to buy several bottles to be entitled to a guarantee; doesn't require a month's treatment; and finally, doesn't enable you to stop tobacco only to find yourself a slave to the habit of tablet chewing.

With Narcoti-Cure, when you are through with tobacco you are through with the remedy. One bottle cures. Send for book of prominent testimonials like the following:

HUNTINGTON, Mass. Mar. 18, 1895. The Narcoti Chemical Co.,

Gentlemen:—I have used tobacco for over twenty-five years, chewing and smoking every day from 7 a. m. to 9 p. m. stopping only for meals. On Monday, February 4, I called at your office in Springfield, and bought a bottle of the Cure which I used as directed and on the tenth day the desire for tobacco had left me and has not returned. I did not lose a meal while taking the cure. My appetite has improved and I consider Narcoti-Cure a grand thing. Very respectfully, CHAS. J. LINCO

Mr. Frank H. Morton, of Chicopee Falls, Mass., late Inspector of Public Buildings for Massachusetts, says: "I used tobacco for twenty-five years, and was a confirmed smoker. In just eight days' treatment with Narcoti-Cure I was through with tobacco, in fact the desire vanished like a dream. Very Respectfully, FRANK H. MORTON.

If your druggist is unable to give full particulars about Narcoti-Cure, send to us for Book of Particulars free, or send \$5 for bottle by mail.

NOT A MONOPOLY

From time to time "Colonial Children" or "Sons of the Revolution" or other bodies of men tracing descent from revolutionary sires struggle to "revive patriotism." Their efforts are needless. The patriotism of the American people is wide and deep and is confined to no class. It may be dormant, apparently buried by the activities of everyday life, but it will rise again, as it has in the past upon any national menace. While these societies that spring from the past may conserve its legacies, it must be remembered that no class has a monopoly of loyalty. The descendant of a revolutionary sire may prove no greater patriot than the foreign born youth waiting for his second papers to become the formal son of his adopted country. Although these ornaments may have a more striking individuality the greatest patriotic order of the country will ignore these subdivisions upon arbitrary lines and continue to comprise the entire population.

ENOUGH HAVE DIED

What is gained by sending missionaries to China to be slaughtered? Travelers agree that but few or the natives join the Christian churches and the majority of these few do so chiefly for the profit there is in doing so.

If the Chinaman is susceptible to conversion where can it be proven more easily than here? There are 100,000 Chinese in the United States. They are surrounded by Christian influences, hosts of them are regular Sunday school attendance. Out of them less than 500 have become even nominal Christians. If the work of Christianizing them cannot be carried on successfully here how is it to be done in China?

VILAS FOR PRESIDENT.

At last we are told why Senator Vilas is a presidential possibility. It is not that he is strong but that the other candidates are so very very weak. Moreover, we are told, he comes from a state which "cannot be carried for democracy without some local recognition."

"And not even there" might be added.

Senator Vilas would come a trifle nearer carrying Wisconsin for the democrats than George W. Peck did last fall, but not much. And how he would suffer in states where cuckoos are not thought to be "almost divinely inspired."

Campos will need all those 25,000 re-inforcements if Cuban war news is to be trusted. Thus far the Cubans have shown capabilities unsuspected by the outer world. Now if they get possession of a good port and put up a provisional government which will command recognition in their own section of the island they may gain recognition from other nations.

One thing that John Bull does and that without delay—he protests his subjects. There are no English consuls lying in foreign prisons without a trial, as Consul Waller of the United States suffers in France. Nor will England deal with the Chinese outrages in the leisurely way adopted by Mr. Cleveland's ministers.

There isn't much comfort to manufacturers in the news that imports are increasing heavily. Under such conditions wages can't be very high in the United States. Still, heavier importation means one encouraging thing—the American people are once more prosperous enough to gratify their reasonable demands.

Give Cleveland a third term and there wouldn't be a desirable island or harbor on the South American

coast but England would have time to acquire.

New York bosses—democratic and republican—are unhappy without a feud. They furnish good examples for Wisconsin to avoid.

A Voluntary Endorsement.

Among Dr. Wray's many Rockford patients is Mr. F. A. Buckingham, whose letter appears below. Mr. Buckingham was so grateful to the doctor that he wrote and published this letter in the Rockford Star last Sunday morning, paying for it himself. Dr. Wray will be at the Myers hotel every Monday. He guarantees a cure and no money is required until the same is effected, to the satisfaction of the patient. Parties suffering with rupture will do well to call and see him.

Rockford, Ill., August 3.—F. H. Wray, M. D.—Friend: Yes, friend; for I certainly can call you such for what has been done for me. About ten or twelve years ago by lifting a sick man, I was ruptured on the left side, and have had so much trouble with it that at times I did not know what to do, and the doctors said it was no good, my age was against me, (sixty-four years.) I tried truss after truss; no good; nothing I could do was of any avail. I despaired of any help; saw your ad, and after thinking over the matter thought I would try once more. I took my first treatment of you on the 22d day of June and paid attention to your orders. Now, after a little over a month, I can safely say there are no signs of my trouble, and I consider that I am well. I can lift all the weight that my strength will allow and strain in my position. There are no signs of the old trouble. I have tried in all shapes to see if there was any bunch; but no. If anybody asks you if you can cure them tell them yes. I know you can. Respectfully,
F. A. BUCKINGHAM,

J. J. DAILEY IS FINED FOR BEATING A GIRL

IT COST HIM JUST \$34 TO ABUSE NELLIE FITZGERALD.

Young Woman Was Very Painfully Bruised, But the Charge Had to Be Simple Assault—August Vobian Chewed His Daughter-in-Law's Fingers—Other Court Cases.

In all probability J. J. Dailey will think twice before he forces his attention on another Janesville young woman, for his last experience cost him just \$34. Dailey was arrested by Officer Hogan after he had torn Nellie Fitzgerald's clothes to tatters and bruised her painfully. The fracas occurred near the "Five Points," about 1 o'clock in the morning. When Officer Hogan got Dailey he was pummeling Miss Fitzgerald in a very ungentlemanly way, and later on he tried to pummel the officer. In this respect he was not so successful and was lodged in jail. The only charge that could be made against Dailey was assault and battery, although the authorities considered the case one where a stronger charge would not be unjust. Dailey withdrew a plea of not guilty when the case came before Judge Phelps this morning, and admitted the offense, whereupon the court imposed a fine of \$25 and costs, amounting to \$34 which Dailey paid.

Chewed a Woman's Fingers.

Herman Vobian was brought before Judge Phelps this morning it being charged that he had chewed his daughter-in-law's fingers. The complaint was made by Vobian's son, Ernest Vobian, but when the time came for trial, Mr. Vobian, Jr., said that his father had no money to pay a fine and that if the old gentleman would agree to do better in the future he would have the case dismissed. The prisoner was willing to promise so the court read him a lecture and let him go.

Samuel Cooley was also before the court this morning. Officer Hogan charged him with being drunk and disorderly but young Cooley begged hard and promised profusely and the judge let him go.

The case of the state against Bertha Brown who was charged with assault and battery by her mother-in-law Mrs. "Blackhawk" Brown was called at 3 o'clock yesterday afternoon and concluded with Mrs. Brown's conviction at five o'clock. Mrs. Brown went to jail for ten days rather than pay a \$5 fine.

HARD TIMES AFFECT PICNICS. Concordia Society Came Out No More Than About Even.

"If ever hard times were noticed, it was at our picnic," remarked a Concordia society member today. "The Concordia picnics have been noted for their crowds, but this year it was different, and the same has been true of all the picnics. None of them have drawn as in previous years. The Concordia society's expenses this year were no heavier than before but in spite of this they barely came out even, while last year they cleared \$80. We have seen the time when we cleared close to \$180."

MAY HAVE A GOOD NINE HERE. Western League May Come To An End Soon, It Is Said.

Local "fans" prophesy that the Western league, to which the Dubuque club belongs, will come to a sudden end. Great dissatisfaction has existed between the clubs for some time. If the smash comes Janesville will see great things in the ball line, for the Dubuque team is composed almost entirely of Janesville boys, who are admitted to be the best in the league. If the boys come home a nine could be organized here that would sweep the state.

POTATO BUGS CAME IN 1866. Rev. J. B. Noyes Tells of The Colorado Beetle's Advent In Rock.

Rev. J. B. Noyes says the striped potato bug came to Rock county first in 1866, and was then known as the Colorado beetle or the "twenty-five year pest." By 1869 it had taken possession of every field. Comparatively few of the Colorado beetles have been seen this year, but the black potato bugs, which were here once before, twenty years ago, have done damage enough for both sorts and thrive on Paris green quite as well as on vines.

POTATOES WILL BE VERY CHEAP. Farmers Are Selling to Local Dealers as Low as Twenty-five Cents.

Potatoes promise to be very cheap this fall, for though the early crop was not large the late varieties are yielding generously. A LaPrairie farmer made the rounds with forty bushels of as fine potatoes as one would care to own and finally let the lot go to a West Side dealer at twenty five cents a bushel—glad to get rid of them even at that price.

JOHN ALLEN DEAD AGED 77 YEARS

OLD SETTLER PASSED AWAY THIS FORENOON.

Worked His Way Through a Boston University and Took High Rank In the Militia—Built Two Rock River Steamers to Supply His Wood Yard.

John Allen died at the county building at 8 o'clock this morning. His specific disease was manifest—it was a breaking down, due to age. The seventy-seventh mile stone in the white-haired old man's journey was passed last February.

When he came to Janesville fifty years ago John Allen took rank as one of the well-to-do men of the village. He had sailed from Ireland when only nineteen, had worked his way through a Boston university, doing chores to pay his board, and had prospered in business. Before he left Boston his ability won him high rank in militia circles, and he brought an officer's uniform west with him.

Janesville was a small place when he arrived and full of the half-boisterous spirit of a western town. The newcomer from Boston was made instantly popular by his Irish wit and his genial disposition. He engaged in business as a contractor, did considerable paving and building and worked hard to develop navigation on Rock river. For years his wood yard occupied the east shore of the river from where the railroad bridge now juts out to where the Fourth avenue bridge stands. Two steamers which he built plied the Rock bringing down cargoes of wood. He went into real estate in a modest way and bought the block just south of the high school.

As time went by business interests were abandoned. Three years ago it was thought best to place the old man in Superintendent Allen's care, the family paying his board.

Besides the wife two children—a son in Boston and a daughter in Waukesha—survive. William Ross, who is a brother-in-law took charge of the remains today and the funeral will be held from his home, 202 S. Third Street at 3 o'clock tomorrow.

John Edward Murray.

This morning at 9 o'clock, the death angel entered the home of Mr. and Mrs. William Murray, Galena street, and took away their only child, John Edward, aged eight months. The little one was a joy to the household and his death will be keenly felt by the afflicted parents who have sympathy of many friends in their hour of bereavement. Notice of the funeral will be given later.

Martin Donnelly. Death came to Martin Donnelly last evening, his demise occurring at 6 o'clock last evening at the residence of his nephew, Thomas Donnelly No. 3 Chestnut street. Mr. Donnelly has been a resident of Rock county for thirty-five years and was fifty-eight years of age. He leaves one brother John Donnelly of this city.

Funeral of Mrs. McCann. The funeral of Mrs. Alice McCann was held from St. Mary's church this morning, Rev. Father Roche officiating after which the remains were taken to Beloit where the interment was made this afternoon.
